Medicaid COPES coverage in many Washington State counties.

The EWC Story

In November of 2001, my father, Earl W. Campbell was diagnosed with ALS or Lou Gehrig's Disease. We knew eventually he would need assistance to merely move from a bed to a wheel chair. In my commitment to have him remain in his home I developed this lift system. He was the inspiration, the trouble shooter and the first user to work out the bugs. In his memory I bring to you this machine that kept him moving.
